

SHYLO: A PRESENT FOR YHWH

Below is a picture of two models in the same scale. The Dome (AVHM) is lifted up so you can see the relationship between Old City of Jerusalem and the King David Hotel II (Chapter 12) below the Dome.

CHAPTER

8

High Mountain:

A Very High Mountain . . . AVHM

On Planet Earth

HIGH MOUNTAIN, A Very High Mountain (AVHM) is what Ezekiel said he was on in his vision. Isaiah said “*Come let us go up to The Mountain of YHWH, to the House of the God of Jacob.*” David’s BRANCH point is, before we can ‘go’ up, we need to DESIGN AND CONSTRUCT THE MOUNTAIN.

Before we can CONSTRUCT THE MOUNTAIN we need to know what ‘The Mountain’ is all about: its location, purpose, shape, design and all its regulations, including THE MOUNTAIN’S Organization and Design Team.

NO HABITAT,

NO PEACE!

CONSTRUCTING A MOUNTAIN

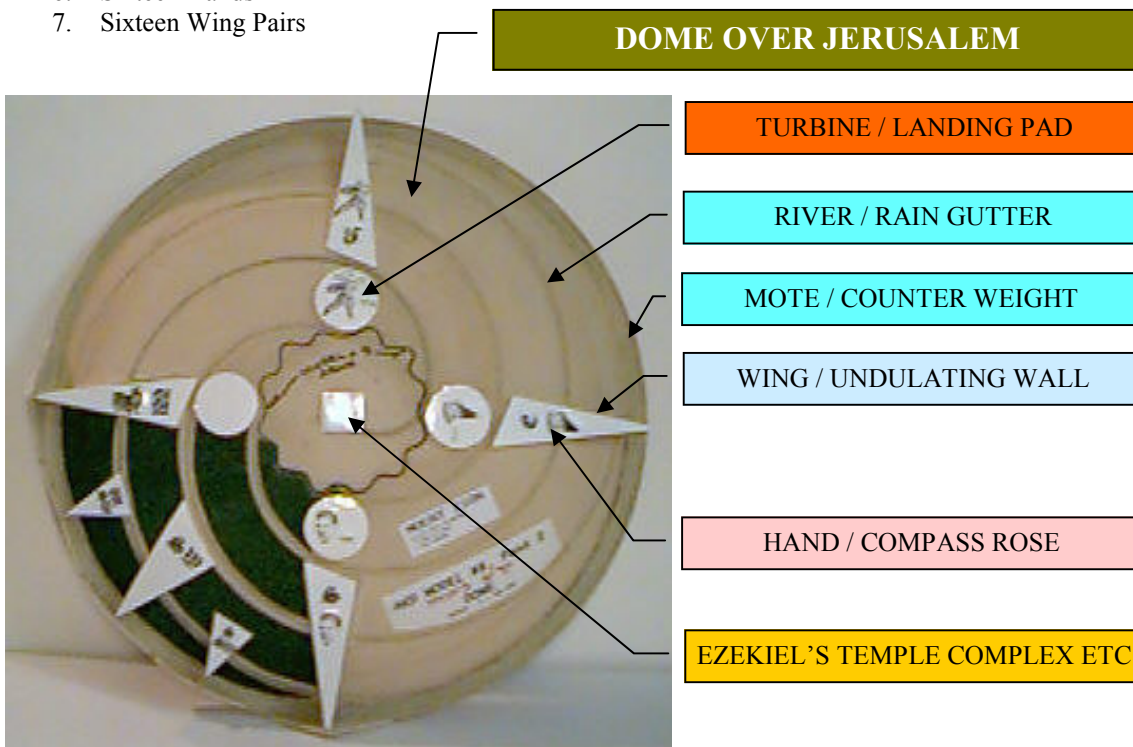

Ezekiel called it A Very High Mountain (AVHM), so we

“In the visions of God [Elohem] brought he me into the land of Israel, and set me upon a very high mountain, Ezekiel 40:2a

call it AVHM. This man made mountain, as we are inspired by YHWH to build, is made up of seven main parts:

1. A dome covering
2. Four turbines/landing pads
3. Four rivers/gutters
4. A mote around the perimeter
5. A temple (Chapter 10)
6. Sixteen Hands
7. Sixteen Wing Pairs

It is important to note that this Chapter provides a very sketchy view of a very complex project; we see in part, but more, much more is yet to come.

The Mountain's Use

You might ask, well, what is it built for, what is its use?

“The Mountain” is to be “exalted above the hills”.

The U.S. President talks about going up on ‘The Hill’ when he goes to ‘Capital Hill’ and makes a speech before Congress.

If ‘The Mountain’ is exalted above these ‘Hills’, then it makes sense to say, “all nations shall flow unto it, at least their representatives do.”

Now we have a hint of the purpose, organization and associations of THE MOUNTAIN, and we will look at this aspect further in Chapter 10. For now we will focus on the physical features of A MOUNTAIN that is “exalted above the hills.”

Mountain's People

From Isaiah 2:1 we know two things: 1) THE MOUNTAIN'S location is JERUSALEM, 2) it concerns Judah, i.e. the Jews play a central roll in THE MOUNTAIN'S purpose, organization and associations. Never-the-less, it is important to remember that its design is “A PRESENT from a people living . . . far away from Jerusalem.” [See Isaiah 18:7] And, it is a House Of Prayer for all nations Everywhere, HOPE.

The Mountain's Virtual Dimensions

Ezekiel in his vision, known as Ezekiel's Temple, opens his description of the facility he visited in virtual reality: (I say virtual reality because, what he saw is yet to be built and we use this phrase to describe CADD planning tools that make it possible for one to sense to some degree a virtual 3-D plan — or with time added to space we have a 4-D Plan.)

“Note that Ezekiel is in the LAND OF ISRAEL, which is where JERUSALEM is located. It is interesting to note that he does not say he is in Jerusalem, but that he is set upon A VERY HIGH MOUNTAIN. If THE MOUNTAIN was a dome that was built over Jerusalem, then Jerusalem would not be visible to him, and he could not report that he was there.

SHYLO: A PRESENT FOR YHWH

Ezekiel does not conclude that THE MOUNTAIN he was on was a man made dome, however he does report that a man escorted him around this virtual facility on A Very High Mountain, and that he was instructed to tell his people that they were to construct this facility sometime in the future. (See Ezekiel 43).

DOME MOUNTAIN

Does Isaiah suggest THE MOUNTAIN'S shape? Is it like most CAPITAL HILLS, with a *domed top building* ?

And the LORD YHWH will create upon every dwelling place of mount Zion, . . . a defense. And there shall be a tabernacle (Hebrew: sook-kaw'; a tent, DOME structure) for a shadow (tsale; shade) in the daytime from the heat, and for a place of refuge, and for a covert (Hebrew: mis-tore'; a thing covering or hiding something so it can't be seen or easily reached, i.e. a cache, a hideout, a mysterious place) from storm and from rain. Isaiah 4:5-6

As you know, it is common practice to build an elaborate 'domed building' on a 'capital hill.' This is true in nearly every State in the United States and in many other countries.

Now the second feature of this mountain is that it is *exalted* above all The Hills; i.e. it must be greater and grander than them all. You can see this in the designs we are proposing.

And Isaiah 4:5 confirms this when he mentions THE GLORY:

Glory is from the Hebrew word KABODE pronounced kaw-bode' meaning: copiousness, more than enough of everything, like a shish kabob filled with all kinds of goodies.

For a third feature Isaiah adds:

“. . . upon all the glory *shall be a defense*. (defense = Hebrew: hup-pah, or khoop-pa; a canopy typically used in a wedding). Also the *huppah* is typically a *domed* structure, like a supper sized umbrella placed overhead of the bride and groom at their wedding. This covering protects the occupants from inclement weather, etc.

For a fourth feature of THE MOUNTAIN we examine the word Zion (Zion is a Hebrew word meaning: *permanent capital*.) YHWH,

The Projects Client, uses the hands of His Servants; professional architects, engineers, designers, etc., *to create* A DOME STRUCTURE, a huppah OVER “*every dwelling place of Mount Zion*”: That is, the Dome Structure will be over every home, hotel, and business located under this GLORIOUS DOME. The verse continues:

“ . . . and upon (for and OVER) *her assemblies* (Hebrew: mikraw’; a *public meeting place*), a *cloud*. These features (5) THE ASSEMBLIES and (6) THE CLOUD are discussed in chapters 10 and 11. A Hotel (7) under THE MOUNTAIN is discussed in chapter 12.

Event Planning on the Mountain

Jesus alluded to this ‘covering’ when he spoke of his ‘second coming’, the EVENT we are PLANNING:

Mat 23:37-39 ”*O Jerusalem, Jerusalem*”, *thou that killest the prophets, and stonest them which are sent unto thee, how often would I have gathered thy children together, even as a hen gathereth her chickens “under her wings, (DOME?) and ye would not! Behold, your house is left unto you desolate.”* (This last phrase is history.)

Continuing with verse 39: “For I say unto you, *Ye shall not see me henceforth, till ye shall say, ‘Blessed is he that cometh in the name of the Lord.’*”

Accomplishing this blessing requires EVENT PLANNING! Psalm 118:26 Blessed be he that cometh in the name of the LORD YHWH: **we have blessed you out of the house of the LORD YHWH.**

How can Jerusalem say this if we don't have THE HOUSE?

GUTTERS AROUND THE MOUNTAIN

Isaiah 4:6 also tells us that the DOME deflects the rain.

The rain doesn't just sheet over the side of the dome but is collected in specially made GUTTERS.

These GUTTERS are described by Ezekiel. They begin as a rivulet at the top of the DOME and become a river by the time the water reaches the bottom, see Ezekiel 47:1+. The DOME'S interior condensation is also handled by the GUTTERS as well as the rain.

SHYLO: A PRESENT FOR YHWH

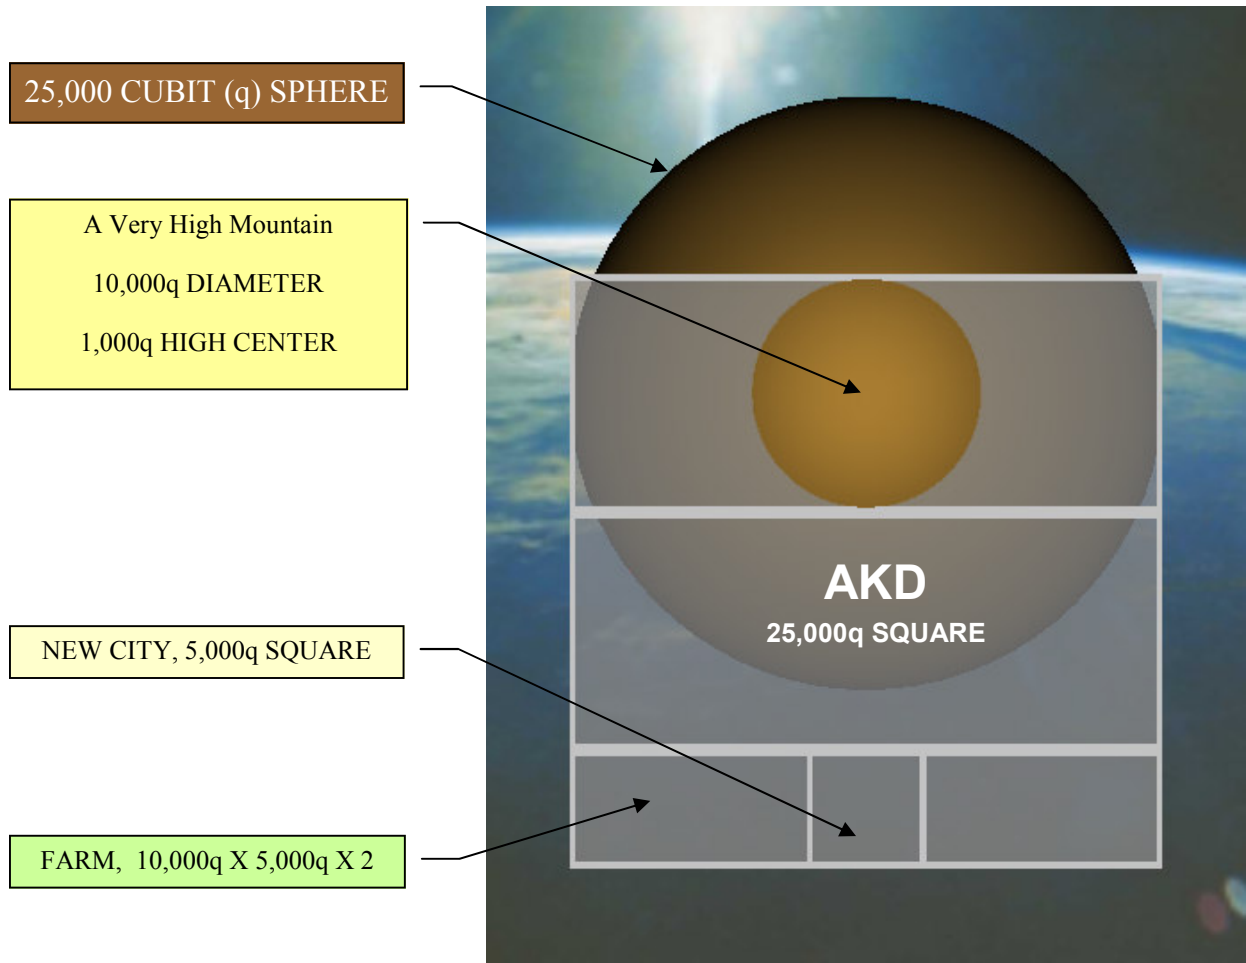

Ezekiel says the water starts its flow as a small stream from the very center of the dome, “under the Altar” and proceeds to the edge of the HABITAT (300 cubits from the center). Shortly after the stream flows out from under THE CLOUD [See Chapter 11] (1,300 cubits away from the center) it is described as ankle deep. This stream flows gently in a spiral around the DOME increasing in volume as it descends toward the water reservoir, a MOTE encompassing the base of the DOME.

There are actually 4 such GUTTERS dividing the DOME’S water shed into four segments, one beginning at each side of the HABITAT. If you walk straight down THE MOUNTAIN, as Ezekiel did, from the HABITAT to the MOTE around the DOME’S base you would encounter one of these four GUTTERS every 1,000 cubits (1,300q ankle deep; 2,300q knee deep; 3,300q loins deep; and finally at 4,300 cubits, an impassable river.)

This provides another indication of the diameter of the DOME. The diameter of the DOME, including the water reservoir, and wall around its base is 10,000 cubits diameter.

The height in the center of the dome is 1,000 cubits and the diameter of the sphere for constructing the shape of the dome is 25,000 cubits. This makes A Very High Mountain, slightly over

2,000 feet high; that is, about 1,400 meters above Sea Level at the top, or 635 meters from the foundation to the underside apex of the dome.

The top surface of the DOME is 50 cubits thick and it too is constructed from a 25,000 cubit sphere.

The CLOUD above the DOME skewers the atmosphere for 10,000 cubits above the top of the DOME. [Chapter 11]

SHYLO: A PRESENT FOR YHWH

SUMMARY

This MOUNTAIN will produce a lot of water and energy every day.

Of all the Hills (Capital Hills) on Earth, this ONE MOUNTAIN is exalted above them all.

THE MOUNTAIN is a CONSTRUCTION PROJECT with YHWH as its Client/Sponsor.

THE MOUNTAIN is a seemingly impossible project on par with sending people to space.

THE MOUNTAIN is a DOME STRUCTURE located over Jerusalem.

THE MOUNTAIN is exalted above all the NATION'S CAPITALS.

THE MOUNTAIN'S primary benefit is the elimination of the need for war as a means of resolving national conflicts and a source of water and power for the Middle East.

Many people with diverse backgrounds will contribute to the design and construction of THE MOUNTAIN.

THE ASSEMBLY Buildings will be on the top of THE MOUNTAIN. (Assembly Buildings is correct as a plural word, there are in fact 40 separate Assembly structures described in Eze-kiel's description of the HABITAT, excluding the gates.)

Over all THE ASSEMBLY will be a very high man made CLOUD like structure. (See Chapter 11)

THE MOUNTAIN'S CLOUD covering will generate water, electricity, cold fresh air, and light. [See Chapter 11]

The DOME MOUNTAIN and the CLOUD will provide shelter from the rain and wind.

The MOUNTAIN
